For more Information Please contact :

Join us for an immersive two-week experience designed to equip you with cutting-edge knowledge and hands-on expertise in Internet of Things (IoT), Edge Networks, and Artificial Intelligence (AI). Collaborate with experts, innovate alongside peers, and work on transformative projects that bridge the gap between technology and real-world applications.

The IoT Summer School 2026 is divided into two exciting weeks focusing on building innovative projects and participating in a English & Culture Classes and hands on laboratories in Smart Campus.

Morning: English & Culture Classes

Afternoon: Smart Campus Laboratories

Building Innovative Projects

Gain practical experience and create your own advanced technological solutions through one of the following guided projects:

1. Internet of Things, smart Campus, using IoT sensors, Mobile app, and edge computing technologies..
3. Interactive Talking Robot: Design and program an AI-powered robot capable of meaningful interactions, speech recognition, and task execution.

Hands-on mentoring sessions will provide the guidance and resources you need to develop these exciting prototypes.

Morning: English & Culture Classes

Afternoon: Smart Campus Laboratories

Building Innovative Projects

Gain practical experience and create your own advanced technological solutions through one of the following guided projects:

1. **Autonomous Smart Car:** Build a self-driving vehicle prototype using IoT sensors, AI algorithms, and edge computing technologies.
2. **AI based Digital Twin.**

Hands-on mentoring sessions will provide the guidance and resources you need to develop these exciting prototypes.

International Summer School 2024

Who Should Attend?

This program is ideal for:

University Students who want International experience
who want to see different culture and improve their
English.

- University students and researchers in tech-related fields.
- Professionals seeking hands-on experience in IoT, AI, and Edge Networks.
- Innovators passionate about creating impactful tech solutions.

For queries and additional details:

Ireland

- Ireland is an island of 84,430 sq. km (32,598 sq. miles) located on the western European seaboard.
- English is the primary vernacular and administrative language of Ireland. Irish (Gaelic) is the national language.
- The population of the island of Ireland is approximately 5.7 million people.
- Coming after Dublin, Belfast and Cork in size, Limerick is the fourth-largest city on the island of Ireland.
- Ireland has a mild climate all year round: temperatures average 2° to 7°C (35° to 45°F) in winter and 18° to 24°C (65° to 75°F) in summer.
- Ireland is in the Greenwich Mean Time (GMT) zone.
- The currency of the Republic of Ireland is the Euro (€).

Why Limerick?

Limerick city (population 80,000) is the third-largest city in the Republic of Ireland. Limerick is easily accessible by air, coach or train. The city is located 20 km from Shannon International Airport. There are direct connections between Shannon Airport (SNN) and major cities in the USA, UK and Europe. Limerick is renowned as a centre of excellence for technology. It is home to the National Technology Park and to many international electronics and technology firms. Limerick offers its visitors an extensive range of attractions, museums and art galleries. For sporting enthusiasts, Limerick offers a wide range of sports, from Gaelic games (hurling and football) to the city's favourite sport, rugby. Limerick and the University of Limerick are home to Coaching Ireland and to the University Arena, which houses Ireland's first 50-metre Olympic swimming pool.
